Halloween Activity Ideas

Pumpkin Dipping

Learners must push an object across the water, using only their heads, noses, or by blowing bubbles.

Spiders Webs

Ask the learners to do a star float on their front and their back. For Halloween this can be called a 'Spiders' Web'. See how many learners can hold hands or use woggles to link together to make a huge web!

Witches Races

Get learners to sit on their broomsticks (woggles) and race each other across the pool. For a harder challenge, get learners to race in pairs.

The Cauldron Pots

Learners must collect the ingredients (floats and dive sticks) and place them in the cauldron (a big floating ring). Once all ingredients have been collected, learners must stir the ingredients by moving around the pot. Make sure learners remember to say a magic spell, to complete their potion.

Magic Wishing Wells

Learners to fill up a watering can, bowl or cup with water, make a wish and sprinkle it over themselves or fellow learners.

Ghost Tag

One learner can be 'on' (can be a monster of choice – depending on age of learners) and they must try and 'catch' or 'tag' as many of the other learners as possible by swimming or walking across the pool. Once 'tagged' they must stay as still as possible until another learner 'sets them free'. They must not exit and re-enter the water.

Skeletons Push and Glide

Learners must push and glide on their front and back, whilst doing their best skeleton impression.

Funny Bone Floating

Different floats shapes in a Halloween style for example funny bones, skeletons, ghosts and bats.

Pumpkin Bobbing

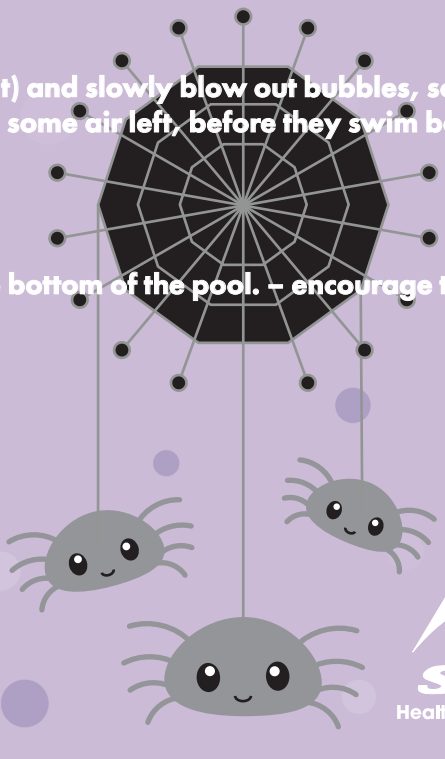

Encourage learners to become a pumpkin (by doing a mushroom float) and slowly blow out bubbles, so they sink to the bottom of the pool. Be sure to advice your learners to have some air left, before they swim back to the surface.

Monster Bobbing

Encouraging learners to put faces in to try and see the monsters at the bottom of the pool. – encourage them to name as many monsters as possible!
